

## **Cyber Tactics is a leading provider of cybersecurity strategy and solutions for federal and commercial organizations.**

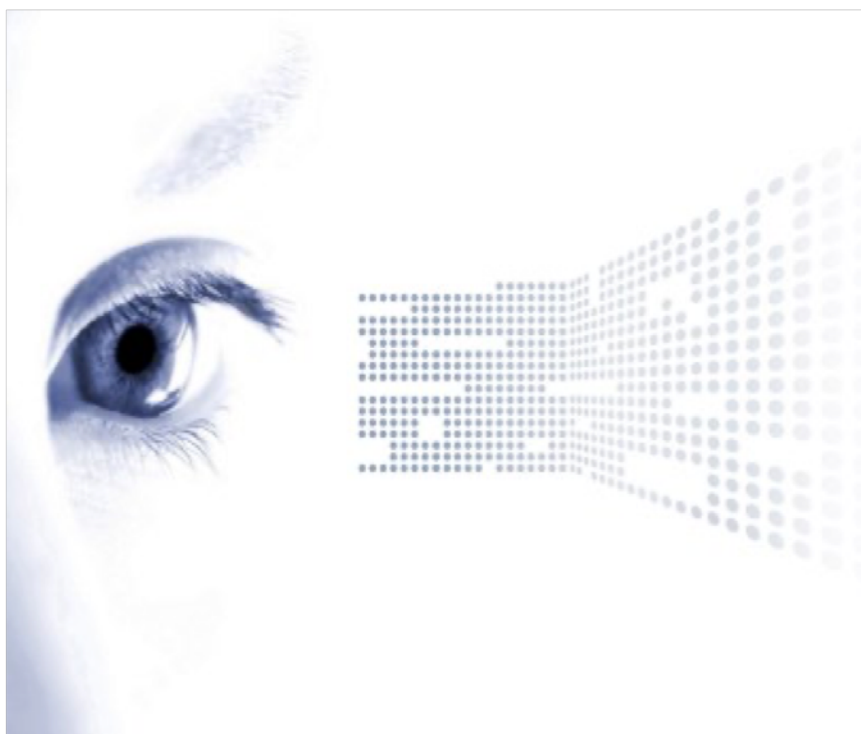

Cyber Tactics understands that in today's digital world it is critical to safeguard intellectual property (IP), classified information, personally identifiable information (PII), financial data and your organization's reputation. With the ever increasing sophistication of threats and the number of attacks, your business is at risk. The impact to your organization can be devastating. It is necessary to protect your organization's assets by lessening the overall risk of doing business in today's digital marketplace.

Staying vigilant and having defensive security measures can protect your organization from some of today's threats, but it's the unknowns which inevitably are the largest problem. When incidents happen, being able to quickly assess, contain, and remediate the threat is critical. Cyber Tactics ensures your organization recovers quickly.
