

Securing the Cloud

Providing cybersecurity strategy and solutions in the Cloud

FedRAMP Compliance Experts:

Cyber Tactics provides security assessments for Cloud Service Providers. We are the leader in helping Federal Agencies and CSPs implement security controls, enhancements, parameters, and requirements within a cloud computing environment to satisfy FedRAMP.

Monitoring and Incident Response Teams:

Cyber Tactics has extensive experience in dealing with advanced threats in today's most complex cloud computing environments. We have an incident response team ready to deploy if threats surface. Our team has deep knowledge of cutting-edge big data analytics tools to best suite each mission and environment.

System and Design Support:

Cyber Tactics provides the design, implementation, and management of cloud environments. From architecture design and big data analytics to training and staff augmentation, Cyber Tactics is leading the way in next generation cloud computing strategy and solutions.

- Big Data Analytics
- Cybersecurity Engineering
- Computer Forensics, eDiscovery
- Mobile Security
- IT Compliance (Audit, Consulting, Advisory) PCI, PII
- Cloud and Big Data Security (FedRAMP)
- SCADA Security
- Advanced Persistent Threat (APT) Detection
- Federal / Defense Incident Response
- Network Security Engineering, Design, Implementation
- Governance
